Monthly Report

PAR 214

29 Oct 65

SUBJECT: Roller Transport Processor (12-Inch)

TASK/PROBLEM

1. Design and fabricate a versatile self-threading photographic processor capable of handling both cut sheet and continuous webs of photographic material and adaptable to a process yielding either standard negative or reversal images. Interchange between processes to be accomplished with a minimum of effort.

DISCUSSION

2. Preparation of the operation manual, which will serve as the final report, is nearing completion.

PLANNED ACTIVITY

3. Transmit the operation manual to the cusomter in November 1965.
